EXPERIENCE

Software Developer

Aug 2024 – Present

PenguinApps

Mumbai, MH

- Delivered production features across multiple client products used by internal teams and external users.
- Owned development of CMS dashboards and Android applications deployed to the Google Play Store; delivered Shopify Liquid themes, apps, and GraphQL integrations for third-party marketplaces.
- Designed UI/UX in Figma and implemented production-ready interfaces in React and React Native.
- Worked directly with clients to translate business requirements into technical solutions and ensure timely delivery.
- Learned and worked on technologies on the fly with ease.

Frontend Developer Intern

Mar. 2024 – June 2024

XIRCLS - 360° Martech Stack and Decentralized Collaborative Marketing Network

Mumbai, MH

- Worked on the entirety of the Shopify CRM which Included making a few client-sided and server sided filters, various forms for product/user CRUD operations with clean UI using both GraphQL and REST.
- Worked on a Flowchart Maker for WhatsApp Automation using ReactFlow.

Software Developer Intern

Oct 2023 – Dec 2023

Business Web Solutions

Remote

- Worked on multiple projects using technologies like React, HTML/CSS/JS, Bootstrap, jQuery, React, Django, PostgreSQL etc.
- Built a Social Media Application using Django as the framework.

PROJECTS

Product Intelligence Platform | *Express, React, PostgreSQL, Redis, AWS EC2, Docker, Gemini API* Jan 2026

- Built an event-driven analytics platform that ingests high-volume product events through a Node.js API and processes them asynchronously using Redis Streams workers
- Designed a PostgreSQL analytics engine generating real-time metrics including DAU, event distributions, revenue tracking, and user lifetime value
- Developed a React dashboard with interactive charts and AI-generated insights powered by Google Gemini for automated product analytics summaries
- Deployed the system on AWS EC2 using Docker, Nginx, and Redis with caching, rate limiting, and optimized queries for scalable analytics processing

Careers Page Builder | *MongoDB, Express, React, Node.js, Render, Vercel*

Feb 2026

- Developed a full-stack careers page builder enabling recruiters to create and manage careers pages without writing code
- Implemented a data-driven architecture where page sections, layouts, and theme settings are dynamically stored in the database
- Built a modular React rendering system that dynamically generates page components from backend configuration
- Designed a recruiter editor interface for updating content and structure with real-time preview and publishing capabilities
